CUSTOM CABINET MANUFACTURER MOVES MANUFACTURING FACILITY TO PORT OF CENTRALIA

Baileysburg Cabinets has entered into a lease agreement to locate its facility to the Port of Centralia. The custom cabinet, millwork, and furniture manufacturer caters to the commercial and institutional market, having completed projects for private and government locations nationwide. With nearly 30 years' experience in the woodworking industry, Baileysburg Cabinets also has experience with LEED certification projects and uses eco-friendly materials. The manufacturer will occupy a 20,000 square foot building located on Northpark Drive in the Port's Park I development.

Dan Tomczek, president of Baileysburg Cabinets, said, "My wife and I are happy to have our company back in the Port of Centralia. Due to rapid growth we will be hiring several additional employees in the coming months. The Port of Centralia is the perfect address for our company with its central location and close proximity to our suppliers. Our interaction with the commissioners and staff has been great; they are professional and have demonstrated a genuine interest in the success of our business."

Port of Centralia Commission President Gene Groshong stated, "We are very pleased to have such a quality company return to our port, especially at a time when our community sorely needs jobs. We look forward to continuing our working relationship with Baileysburg Cabinets."

Founded in 1986, the Port of Centralia operates two industrial parks comprising over 1,100 acres with over 30 tenants, including Michaels, Millard Refrigeration, Scot Industries, Lowe's, and Dick's Brewing Company.
