SAYLER CUSTOM CONTROLS SELECTS PORT OF CENTRALIA FOR EXPANSION FACILITY

Sayler Custom Controls has entered into a lease agreement to locate a new manufacturing plant with the Port of Centralia. Sayler Custom Controls is a manufacturer of UL listed industrial control panels. They began business in Wilsonville, OR in 1987. The company specializes in general use UL508 panels, explosion proof UL698 panels, intrinsically safe UL 698A panels, marine applications, and utility control panels used in wind farms, co-generation plants, small hydro and pulverized coal, geothermal and substation controls throughout the world, packaged drives and controls, controls for pulp and paper, and Hi-Tech Fabs. The company will occupy a 3,400 square foot facility located at 3717 Galvin Road in the Port's Park I development.

Gayle Sayler, President of Sayler Custom Controls stated "We are looking forward to locating our facility in Centralia and have already received great interest from local vendors in our product." Sayler added "Sayler Custom Controls had been looking in the Lewis County area for a facility and was very happy to find a building that suits their needs at the Port of Centralia."

Port of Centralia Commission President Gene Groshong stated, "We are glad that the Port was able to provide a facility to meet Sayler Custom Control's needs. We are happy we could entice this company to come to Lewis County and we look forward to a long term relationship with this firm."
